INTRODUCTION OF ACCESSORIES

KS-11D
Wireless Panic Button
Radiation distance: 800m (in the open area).Wireless radiation circuit exerts SAW resonator. Frequency stabilization.

KS-18A
Wired Panic Button
Working Voltage: 12V DC
Use key to reset.

KS-52B
Outdoor wireless repeater
It can transmit all the alarm signal of wireless 433 detectors from Karassn

KS-50C
Indoor wireless repeater
Interference-immune, stable in wireless transmission
It can transmit all the alarm signal of wireless 433 detectors from Karassn
